

### 2014 - 2020 Structural Funds eligibility-Comparison of reference periods

The regional GDP of the year 2016 at NUTS2 level was published by Eurostat on 28 february 2018. Below is a comparison between average GDP of the years 2007, 2008 and 2009 used to determine the structural funds eligibility in the three categories of regions (Less Developed Regions LDR, Transition and More Developed Regions MDR) and an eligibility simulation redefining in which category the regions could be if the more recent data published are used. Results has been rounded to the unit.

#### 1- Regions which would change eligibility if the more recent three years average GDP was used (GDP UE27 average).

CPMR members	Average GDP 2007, 2008 and 2009	Structural Funds eligibility 2014-2020	GDP difference	Eligibility simulation based on last GDP published	Average GDP 2014, 2015 and 2016
