Integrated Waste Management System for Sustainable Tourism in Tulcea County

Project Co-financed from the European Regional Development Fund

CONȘILIUL JUDEȚEAN TULCEA

The total value of the project without VAT is 108,904,821 LEI

The general objective of the project - to develop a sustainable waste management system to European standards in Tulcea county by improving the services and reducing the number of non-compliant deposits in the county, in accordance with the practices and policies of the European Union and in the context of Priority Axis 2 of the Sectoral Operational Program "environment ".

PROJECT OBJECTIVES
The specific objectives of the project are defined on the basis of the MDI 2.1 objectives of the SOP Environment and are aimed at:

- Increasing the degree of coverage of the population benefiting from the collection of municipal waste and the quality management services corresponding to acceptable rates;
- Reducing the amount of waste deposited;
- Increasing the amount of recycled and recovered waste;
- Setting up efficient waste management structures.
The final beneficiaries of the project will be the county households, the administrative and social institutions, as well as the economic agents that operate in Tulcea County, depending on the type of waste they produce.

The entire population of the county will benefit from this project, respectively the residents from urban and rural areas.

The integrated waste management system will improve the quality of the environment and the living conditions of the residents of Tulcea County.

Tulcea county is made up of:
- 1 municipality: Tulcea
- 4 cities: Babadag, Isaccea, Macin, Sulina
- 46 communes
- 133 villages.

In the RBDD there are 25 localities of which 1 city (Sulina), 7 communes and 17 villages.
PROJECT DESCRIPTION
- TREATMENT OF BIODEGRADABLE WASTE -

Activities foreseen within the project:
Composting biodegradable waste in 50% of rural households - obtaining compost used as natural fertilizer;
Construction of the mechanical-biological treatment station at Mihai Bravu - obtaining of biostabilized material used as a coating for storage

The biodegradable waste can be treated and diverted from storage!
Activities foreseen within the project:

Closing of non-compliant urban waste dumps (Isaccea, Macin and Sulina);
Construction of the waste warehouse according to Mihai Bravu.
FOR A BETTER FUTURE!
TULCEA COUNTY CLEANING starts with you!
Thank you for your attention!
